The Clinical Journal of Pain

Volume 14, 1998

Subject Index

AAPM President's Message

- Gullible's travels, 187
- Talk the talk, 95
- Total pain care—New Concept?, 280
- Whither quality?, 2

Abortion

- Assessment of pain during medical procedures: A comparison of three scales, 343

Acupuncture

- Controlled trial of Japanese acupuncture for chronic myofascial neck pain: Assessment of specific and nonspecific effects of treatment, 248

Age bias

- Age as a factor in admission to chronic pain rehabilitation, 121

Agreement

- Agreement between child and parent reports of pain, 336

Amputation stump pain

- Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97

Analgesia

- Hypnosis after an adverse response to opioids in an ICU burn patient, 167

Anesthetic, local

- Analysis of peak magnitude and duration of analgesia produced by local anesthetics injected into sympathetic ganglia of Complex Regional Pain Syndrome patients, 216

Angina pectoris treatment

- Long-term home treatment with epidural analgesia does not affect later spinal cord stimulation in patients with otherwise intractable angina pectoris, 315

Anxiety

- Self-reported sleep and mood disturbance in chronic pain, 311

Assessment

- Agreement between child and parent reports of pain, 336
- Can we screen for problematic back pain? A screening questionnaire for predicting outcome in acute and subacute back pain, 209
- Evaluation of the Faces Pain Scale for use with the elderly, 29
- Myofascial pain syndrome and fibromyalgia: A critical assessment and alternate view, 74

Back pain

- Can we screen for problematic back pain? A screening questionnaire for predicting outcome in acute and subacute back pain, 209
- The problem of pain in the clinicopathological method, 197
- Spontaneous onset of back pain, 129

Barbiturate

- Effect of barbiturate on central pain: Difference between intravenous administration and oral administration, 86

Bony metastasis

- Percutaneous electrical nerve stimulation (PENS): A complementary therapy for management of pain secondary to bony metastasis, 320

Book reviews

- Acupuncture Energetics: A Clinical Approach for Physicians*, 178
- Disease, Pain and Suicidal Behavior*, 179
- Group work with Elders: 50 Therapeutic Exercises for Reminiscence, Validation, and Remotivation*, 178
- Handbook of Pain and Aging (The Plenum Series in Adult Development and Aging)*, 272
- Molecular Neurobiology of Pain (Progress in Pain Research and Management, Volume 9)*, 180
- The Pain Management Handbook: A Concise Guide to Diagnosis and Treatment*, 357
- Principles and Practice of Supportive Oncology*, 272

Burn pain

- Hypnosis after an adverse response to opioids in an ICU burn patient, 167
- Oral methadone for the treatment of severe pain in hospitalized children: A report of five cases, 350

Cancer pain

- Chest tube insertion: A prospective evaluation of pain management, 152
- Comparison of the effects of perceived self-efficacy on coping with chronic pain cancer pain and coping with chronic low back pain, 303
- Oral methadone for the treatment of severe pain in hospitalized children: A report of five cases, 350

Capsaicin, topical

- Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97

Carbamazepine

- Effect of carbamazepine on pain scores of unipolar depressed patients with chronic pain: A trial of off-on-off-on design, 61

Carbamazepine, serum levels

- Effect of carbamazepine on pain scores of unipolar depressed patients with chronic pain: A trial of off-on-off-on design, 61

Catheterization, long-term spinal

- Efficacy and technical complications of long-term continuous intraspinal infusions of opioid and/or bupivacaine in refractory nonmalignant pain: A comparison between the epidural and the intrathecal approach with externalized or implanted catheters and infusion pumps, 4

Catheterization, long-term subarachnoid

- Continuous infusion of opioid and bupivacaine by externalized intrathecal catheters in long-term treatment of "refractory" non-malignant pain, 17

Causalgia

- Complex Regional Pain Syndromes: Guidelines for therapy, 155

Central pain

- Effect of barbiturate on central pain: Difference between intravenous administration and oral administration, 86

Child

- Agreement between child and parent reports of pain, 336
- Chronic pain

- Comparison of integrated group therapy and group relaxation training for fibromyalgia, 232
 - Comparison of the effects of perceived self-efficacy on coping with chronic pain cancer pain and coping with chronic low back pain, 303
 - Controlled trial of Japanese acupuncture for chronic myofascial neck pain: Assessment of specific and nonspecific effects of treatment, 248
 - Effect of carbamazepine on pain scores of unipolar depressed patients with chronic pain: A trial of off-on-off-on design, 61

Spontaneous onset of back pain, 129
- Neck pain
Can we screen for problematic back pain? A screening questionnaire for predicting outcome in acute and subacute back pain, 209
- Neonatal analgesia
A simultaneous comparison of three neonatal pain scales during common NICU procedures, 39
- Neonatal pain
A simultaneous comparison of three neonatal pain scales during common NICU procedures, 39
- Neonatal sedation
A simultaneous comparison of three neonatal pain scales during common NICU procedures, 39
- Neural dysfunction
Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Neuralgia
Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Nonmalignant pain
Continuous infusion of opioid and bupivacaine by externalized intrathecal catheters in long-term treatment of "refractory" nonmalignant pain, 17
Efficacy and technical complications of long-term continuous intraspinal infusions of opioid and/or bupivacaine in refractory nonmalignant pain: A comparison between the epidural and the intrathecal approach with externalized or implanted catheters and infusion pumps, 4

- Nonspecific effects
 Controlled trial of Japanese acupuncture for chronic myofascial neck pain: Assessment of specific and nonspecific effects of treatment, 248
- Opioids
 Hypnosis after an adverse response to opioids in an ICU burn patient, 167
- Opioids, spinal
 Continuous infusion of opioid and bupivacaine by externalized intrathecal catheters in long-term treatment of "refractory" non-malignant pain, 17
 Efficacy and technical complications of long-term continuous intraspinal infusions of opioid and/or bupivacaine in refractory nonmalignant pain: A comparison between the epidural and the intrathecal approach with externalized or implanted catheters and infusion pumps, 4
- Oral administration
 Effect of barbiturate on central pain: Difference between intravenous administration and oral administration, 86
- Pain. *see also* specific type or site
 An invisible history of pain: Early 19th-century Britain and America, 191
 Evaluation of the Faces Pain Scale for use with the elderly, 29
 Personality assessment of patients with Complex Regional Pain Syndrome type I, 295
 The problem of pain in the clinicopathological method, 197
- Pain, acute
 Hypnosis after an adverse response to opioids in an ICU burn patient, 167
- Pain assessment
 Assessment of pain during medical procedures: A comparison of three scales, 343
- Pain clinic
 Perceived efficacy of pain clinics in the rehabilitation of injured workers, 202
- Pain drug therapy
 Oral methadone for the treatment of severe pain in hospitalized children: A report of five cases, 350
- Pain management
 Chest tube insertion: A prospective evaluation of pain management, 152
- Pain measurement
 Assessment of pain during medical procedures: A comparison of three scales, 343
 Children's self-report of postoperative pain intensity and treatment threshold: Determining the adequacy of medication, 116
- Pain, neuropathic
 Gabapentin for treatment of neuropathic pain in a 12-year-old girl, 354
- Pain provocation
 Vibration pain provocation can improve the specificity of MRI in the diagnosis of symptomatic lumbar disc rupture, 239
- Pain scale
 A simultaneous comparison of three neonatal pain scales during common NICU procedures, 39
- Pain treatment
 Continuous infusion of opioid and bupivacaine by externalized intrathecal catheters in long-term treatment of "refractory" non-malignant pain, 17
 Efficacy and technical complications of long-term continuous intraspinal infusions of opioid and/or bupivacaine in refractory nonmalignant pain: A comparison between the epidural and the intrathecal approach with externalized or implanted catheters and infusion pumps, 4
 Long-term transcutaneous electrical nerve stimulation (TENS) use: Impact on medication utilization and physical therapy costs, 66
- Parental pain history
 Social context of pain in children with Juvenile Primary Fibromyalgia Syndrome: Parental pain history and family environment, 107
- Parents
 Agreement between child and parent reports of pain, 336
- Path model
 Validity of MMPI-2 profiles in chronic back pain patients: Differences in path models of coping and somatization, 324
- Pediatrics
 Gabapentin for treatment of neuropathic pain in a 12-year-old girl, 354
 Oral methadone for the treatment of severe pain in hospitalized children: A report of five cases, 350
- Percutaneous electrical nerve stimulation
 Percutaneous electrical nerve stimulation (PENS): A complementary therapy for management of pain secondary to bony metastasis, 320
- Personality tests
 Comparison of integrated group therapy and group relaxation training for fibromyalgia, 232
- Phantom pain
 Stiff upper lip: Coping strategies of World War II veterans with phantom limb pain, 290
- Physical therapy
 Long-term transcutaneous electrical nerve stimulation (TENS) use: Impact on medication utilization and physical therapy costs, 66
- Placebo
 Analysis of peak magnitude and duration of analgesia produced by local anesthetics injected into sympathetic ganglia of Complex Regional Pain Syndrome patients, 216
- Pleural effusion
 Chest tube insertion: A prospective evaluation of pain management, 152
- Postmastectomy pain syndrome
 Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Postoperative pain
 Agreement between child and parent reports of pain, 336
 Children's self-report of postoperative pain intensity and treatment threshold: Determining the adequacy of medication, 116
- Prevention
 Can we screen for problematic back pain? A screening questionnaire for predicting outcome in acute and subacute back pain, 209
- Procedural pain
 Assessment of pain during medical procedures: A comparison of three scales, 343
- Pruritus
 Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Pseudoclaudication
 Symptoms of spinal stenosis do not improve after epidural steroid injection, 148
- Psoriasis
 Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Psychological dysfunction
 Personality assessment of patients with Complex Regional Pain Syndrome type I, 295

- Stressful life events and psychological dysfunction in Complex Regional Pain Syndrome type I, 143
- Psychological treatment
- Comparison of integrated group therapy and group relaxation training for fibromyalgia, 232
- Randomized controlled trial
- Homeopathic *Arnica* 30X is ineffective for muscle soreness after long-distance running: A randomized, double-blind, placebo-controlled trial, 227
- Reflex sympathetic dystrophy (RSD)
- Complex Regional Pain Syndrome I (CRPS I): Prospective study and laboratory evaluation, 282
 - Complex Regional Pain Syndromes: Guidelines for therapy, 155
 - IASP diagnostic criteria for Complex regional Pain Syndrome: A preliminary empirical validation study, 48
 - Personality assessment of patients with Complex Regional Pain Syndrome type I, 295
 - Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Rehabilitation
- Perceived efficacy of pain clinics in the rehabilitation of injured workers, 202
- Reliability
- Assessment of pain during medical procedures: A comparison of three scales, 343
- Rhinopathy
- Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Risk factors
- Can we screen for problematic back pain? A screening questionnaire for predicting outcome in acute and subacute back pain, 209
- Self-efficacy
- Comparison of the effects of perceived self-efficacy on coping with chronic pain cancer pain and coping with chronic low back pain, 303
- Self-reporting measures
- Children's self-report of postoperative pain intensity and treatment threshold: Determining the adequacy of medication, 116
- Serum Depression Scale
- Effect of carbamazepine on pain scores of unipolar depressed patients with chronic pain: A trial of off-on-off-on design, 61
- Sleep disturbance
- Self-reported sleep and mood disturbance in chronic pain, 311
- Somatization
- Validity of MMPI-2 profiles in chronic back pain patients: Differences in path models of coping and somatization, 324
- Spinal canal stenosis
- Symptoms of spinal stenosis do not improve after epidural steroid injection, 148
- Spinal cord stimulations (SCS)
- Long-term home treatment with epidural analgesia does not affect later spinal cord stimulation in patients with otherwise intractable angina pectoris, 315
- Spinal local anesthetic
- Continuous infusion of opioid and bupivacaine by externalized intrathecal catheters in long-term treatment of "refractory" nonmalignant pain, 17
- Efficacy and technical complications of long-term continuous intraspinal infusions of opioid and/or bupivacaine in refractory nonmalignant pain: A comparison between the epidural and the intrathecal approach with externalized or implanted catheters and infusion pumps, 4
- Spontaneous onset
- Spontaneous onset of back pain, 129
- Steroid, epidural
- Symptoms of spinal stenosis do not improve after epidural steroid injection, 148
- Stressful life events
- Stressful life events and psychological dysfunction in Complex Regional Pain Syndrome type I, 143
- Substance P
- Review of the effectiveness of capsaicin for painful cutaneous disorders and neural dysfunction, 97
- Surgical technique
- Chest tube insertion: A prospective evaluation of pain management, 152
- Swaddling
- A simultaneous comparison of three neonatal pain scales during common NICU procedures, 39
- Sympathetic block
- Analysis of peak magnitude and duration of analgesia produced by local anesthetics injected into sympathetic ganglia of Complex Regional Pain Syndrome patients, 216
- TENS
- Long-term transcutaneous electrical nerve stimulation (TENS) use: Impact on medication utilization and physical therapy costs, 66
- Thoracic epidural anesthesia
- Long-term home treatment with epidural analgesia does not affect later spinal cord stimulation in patients with otherwise intractable angina pectoris, 315
- Tissue pathology
- The problem of pain in the clinicopathological method, 197
- Transcutaneous electrical nerve stimulation (TENS)
- Transcutaneous electrical nerve stimulation in the treatment of chronic pain: Predictive factors and evaluation of the method, 134
